

## ITEMS ALLOWED ON BOARD TUI AIRWAYS

As safety is very important to us, we have rules regarding the carriage of certain items on board of our flights. Therefore we ask you to take the following guidelines into account. If unsure, or if 'TUI Approval' is required, please contact us on 0203 451 2688, or 0203 451 2585 (Medical Necessities). If your flight is operated by a different Operator/Airline, please contact the relevant airline's customer services department or website. Based on IATA DGR 61st Edition January 2020

## MEDICAL NECESSITIES

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
1	Small gaseous oxygen or air cylinders required for medical use.	✓	✓	✓	✓	✓
<b>Restrictions</b>						
a) No more than 5 kg gross mass per cylinder; b) Cylinders, valves and regulators, where fitted, must be protected from damage which could cause inadvertent release of the contents; and c) The commander must be informed of the number of oxygen or air cylinders loaded on board the aeroplane and their loading location(s).  <i>[TOM]            It is TUI Airways policy NOT to permit passengers to carry or use their own oxygen cylinders on board. TUI Airways will supply pre-ordered oxygen cylinders on request. Only empty oxygen cylinders are permitted to be carried as checked baggage.            End [TOM]</i>						

	Devices containing liquid oxygen.	✗	✗	✗	✗	✗
<b>Restrictions</b>						
Devices containing liquid oxygen are forbidden in carry-on baggage, checked baggage or on the person.						

	Empty Air cylinders for other purposes, such as scuba diving.	✓	✓	N/A	✗	✗
<b>Restrictions</b>						
May only be carried if at a pressure less than 200 k Pa at 20o (2 Bar or 29 PSI) empty.						

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
2	Cylinders of a non-flammable, non-toxic gas worn for the operation of mechanical limbs (Division 2.2).	✓	✓	✓	✗	✗
<b>Restrictions</b>						
Spare cylinders of a similar size are also allowed, if required, to ensure an adequate supply for the duration of the journey.						

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
3	Non-radioactive medicinal articles (including aerosols).	✓	✓	✓	✗	✗
<b>Restrictions</b>						
a) No more than 0.5 kg or 0.5 L total net quantity per single article; b) Release valves on aerosols must be protected by a cap or other suitable means to prevent inadvertent release of the contents; and c) No more than 2 kg or 2 L total net quantity of all articles mentioned in 3), 10) and 13) (e.g. four aerosol cans of 500 mL each) per person.						

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
4	Radioisotopic cardiac pacemakers or other medical devices, including those powered by lithium batteries.	N/A	N/A	✓	✗	✗
<b>Restrictions</b>						
Must be implanted into a person or fitted externally as the result of medical treatment.						

	Radio-pharmaceuticals contained within the body of a person.	N/A	N/A	✓	✗	✗
<b>Restrictions</b>						
Must be as the result of medical treatment.						

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
5	<p><b>Electric Mobility aids (WCBD)</b></p> <p><b>Wheelchairs powered by non-spillable wet batteries or batteries which comply with Special Provision A123 or A199.</b></p> <p><b>Includes nickel-metal hydride battery or dry battery.</b></p> <p><b>For use by passengers whose mobility is restricted by either a disability, their health or age, or a temporary mobility problem (e.g. broken leg).</b></p>	✓	✗	✗	✓	✓
<b>Restrictions</b>						
a)	Non-spillable wet batteries must comply with Special Provision A67;					
b)	<p>The operator must verify that where the battery is securely attached to the mobility aid following the instructions of the device manufacturer:</p> <ul style="list-style-type: none"> <li>• The battery terminals are protected from short circuits (e.g. by being enclosed within a battery container); and</li> <li>• Electrical circuits have been isolated.</li> </ul> <p><i>To do this, place the device into drive mode (i.e. not freewheel mode), see if the mobility aid will power up and if so whether use of the joystick results in the mobility aid moving. It must also be verified that the circuits of supplemental motorised systems such as seating systems have been inhibited to prevent inadvertent operation, e.g. by the separation of cable connectors. If an electric mobility aid has not been made safe for carriage, it must not be loaded.</i></p>					
c)	Mobility aids must be carried in a manner such that they are protected from being damaged by the movement of baggage, mail, stores or other cargo;					
d)	The operator must secure, by use of straps, tie downs or other restraint devices, a battery powered mobility aid with installed batteries. The mobility aid, the batteries, electrical cabling and controls must be protected from damage including by the movement of baggage, mail or cargo;					
e)	<p>Where the mobility aid is specifically designed to allow its battery(ies) to be removed by the user:</p> <ul style="list-style-type: none"> <li>• The battery(ies) must be removed; the mobility aid may then be carried as checked baggage without restriction;</li> <li>• The removed battery(ies) must be carried in strong, rigid packaging which must be stowed in the cargo compartment;</li> <li>• The battery(ies) must be protected from short circuit;</li> <li>• Removal of the battery must be performed following the instructions of the manufacturer or device owner.</li> </ul>					
f)	One spare battery allowed in the cargo compartment;					
g)	The commander must be formed of the location of the packed battery/batteries;					
h)	It is recommended that passengers make advance arrangements with each operator.					

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
6	<p><b>Electric Mobility aids (WCBW)</b></p> <p><b>Wheelchairs powered by spillable batteries, for use by passengers whose mobility is restricted by either a disability, their health or age, or a temporary mobility problem (e.g. broken leg).</b></p>	✓	✗	✗	✓	✓
<b>Restrictions</b>						
a)	<p>The operator must secure, by use of straps, tie downs or other restraint devices, a battery powered mobility aid with installed batteries. The mobility aid, the batteries, electrical cabling and controls must be protected from damage including by the movement of baggage, mail or cargo;</p>					
b)	<p>Where possible, the mobility aid must be loaded, stowed, secured and unloaded always in an upright position. The operator must verify that:</p> <ul style="list-style-type: none"> <li>• the battery is securely attached to the mobility aid;</li> <li>• the battery terminals are protected from short circuits (e.g. by being enclosed within a battery container); and</li> <li>• the battery is fitted, where feasible, with spill resistant vent caps;</li> <li>• electrical circuits have been isolated following the manufacturer’s instructions.</li> </ul> <p><i>To do this, place the device into drive mode (i.e. not freewheel mode), see if the mobility aid will power up and if so whether use of the joystick results in the mobility aid moving. It must also be verified that the circuits of supplemental motorised systems such as seating systems have been inhibited to prevent inadvertent operation, e.g. by the separation of cable connectors. If an electric mobility aid has not been made safe for carriage, it must not be loaded.</i></p>					
c)	<p>If the mobility aid cannot be loaded, stowed, secured and unloaded always in an upright position, or if the mobility aid does not adequately protect the battery(ies) they must be removed and carried in strong, rigid packaging, as follows:</p> <p>The operator must verify that:</p> <ul style="list-style-type: none"> <li>• Packaging must be leak-tight, impervious to battery fluid and be protected against upset by securing them to pallets or by securing them in cargo compartments using appropriate means of securement (other than by bracing with freight or baggage) such as by the use of restraining straps, brackets or holders;</li> <li>• Batteries must be protected against short circuits, secured upright in these packaging and surrounded by compatible absorbent material sufficient to absorb their total liquid contents;</li> <li>• These packaging’s must be marked BATTERY, WET, WITH WHEELCHAIR or BATTERY, WET, WITH MOBILITY AID and be labelled with a “Corrosive” label (Figure IATA DGR 7.3.V) and with package orientation label (Figure IATA DGR 7.4.D AND 7.4.E).</li> </ul>					
d)	<p>The commander must be informed of the location of the mobility aid with an installed battery or the location of a packed battery;</p>					
e)	<p>It is recommended that passengers make advance arrangements with each operator.</p>

Portable medical electronic devices (PMED) containing lithium metal cells or batteries not exceeding 2 grams or lithium ion cells or batteries not exceeding 100 Wh.		✓	✓	✓	✗	✗
<b>Restrictions</b>						
a)	Carried by passengers for medical use; and					
b)	Batteries or cells must be of a type which meets the requirements of each test in the UN <i>Manual of Tests and Criteria</i> , Part III, subsection 38.3;					
c)	Each person is limited to a maximum of 15 devices without operator approval.					
Spare batteries for portable medical electronic devices (PMED) containing lithium metal cells or batteries not exceeding 2 grams or lithium ion cells or batteries not exceeding 100 Wh.		✗	✓	✓	✗	✗
<b>Restrictions</b>						
a)	Carried by passengers for medical use;					
b)	Batteries or cells must be of a type which meets the requirements of each test in the UN <i>Manual of Tests and Criteria</i> , Part III, subsection 38.3; and					
c)	Must be individually protected so as to prevent short circuits (by placement in original retail packaging or by otherwise insulating terminals, e.g. by taping over exposed terminals or placing each battery in a separate plastic bag or protective pouch);					
d)	Each person is limited to a maximum of 10 spare batteries without approval.					
Portable medical electronic devices (PMED) containing lithium metal batteries exceeding 2 grams but not exceeding 8 grams or lithium ion batteries exceeding 100 Wh but not exceeding 160 Wh.		✓	✓	✓	✓	✗
<b>Restrictions</b>						
a)	Carried by passengers for medical use; and					
b)	Batteries or cells must be of a type which meets the requirements of each test in the UN <i>Manual of Tests and Criteria</i> , Part III, subsection 38.3;					
c)	No quantity restriction on PMED.					

	<b>Spare batteries for portable medical electronic devices (PMED) containing lithium metal batteries exceeding 2 grams but not exceeding 8 grams or lithium ion batteries exceeding 100 Wh but not exceeding 160 Wh.</b>	✗	✓	✓	✓	✗
<b>Restrictions</b>						
a)	Carried by passengers for medical use;					
b)	Batteries or cells must be of a type which meets the requirements of each test in the UN <i>Manual of Tests and Criteria</i> , Part III, subsection 38.3; and					
c)	Must be individually protected so as to prevent short circuits (by placement in original retail packaging or by otherwise insulating terminals, e.g. by taping over exposed terminals or placing each battery in a separate plastic bag or protective pouch); and					
d)	No more than two spare batteries exceeding 2 grams lithium content for lithium metal or a watt-hour rating of 100 Wh for lithium ion may be carried.					

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
9	Small medical or clinical thermometer which contains mercury.	✓	✗	✗	✗	✗
<b>Restrictions</b>						
a)	No more than one per person;					
b)	Must be for personal use; and					
c)	Must be in its protective case.					

## ARTICLES USED IN DRESSING OR GROOMING

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
10	Non-Radioactive medicinal or toiletry articles (including aerosols). Non-flammable, non-toxic (Division 2.2) aerosols with no subsidiary risk, for sporting or home use.	✓	✓	✓	✗	✗
<b>Restrictions</b>						
a)	The term “toiletry articles (including aerosols)” is intended to include such items as hair sprays, perfumes and colognes;					
b)	No more than 0.5 kg or 0.5 L total net quantity per single article;					
c)	Release valves on aerosols must be protected by a cap or other suitable means to prevent inadvertent release of the contents; and					
d)	No more than 2 kg or 2 L total net quantity of all articles mentioned in 3), 10) and 13) (e.g. four aerosol cans of 500 mL each) per person.					

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
11	Hair curlers containing hydrocarbon gas.	✓	✓	✓	✗	✗
<b>Restrictions</b>						
a)	No more than one per person;					
b)	The safety cover must be securely fitted over the heating element; and					
c)	Gas refills for such curlers must not be carried.					

## CONSUMER ARTICLES

## SECURITY-TYPE EQUIPMENT

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
<b>30</b>	<b>Security-type equipment, such as attaché cases, cash boxes, cash bags, etc., incorporating dangerous goods as part of this equipment, for example, lithium batteries or pyrotechnic material.</b>	✓	✗	✗	✓	✗
<b>Restrictions</b>						
<p>a) The equipment must be equipped with an effective means of preventing accidental activation;</p> <p>b) If the equipment contains an explosive or pyrotechnic substance or an explosive article, this article or substance must be excluded from Class 1 by the appropriate national authority of the State of Manufacture in compliance with Part 2;1.5.2.1;</p> <p>c) If the equipment contains lithium cells or batteries, these cells or batteries must comply with the following restrictions:</p> <ul style="list-style-type: none"> <li>• For a lithium metal cell, the lithium content is not more than 1 g;</li> <li>• For a lithium metal battery, the aggregate lithium content is not more than 2 g;</li> <li>• For lithium ion cells, the Watt-hour rating (see the Glossary of Terms in Attachment 2) is not more than 20 Wh;</li> <li>• For lithium ion batteries, the Watt-hour rating is not more than 100 Wh;</li> <li>• Each cell or battery is of the type proven to meet the requirements of each test in the UN Manual of Tests and Criteria, Part III, subsection 38.3.</li> </ul> <p>d) If the equipment contains gases to expel dye or ink:</p> <ul style="list-style-type: none"> <li>• Only gas cartridges and receptacles, small, containing gas with a capacity not exceeding 50 mL, containing no constituents subject to these Instructions other than a Division 2.2 gas, are allowed;</li> <li>• The release of gas must not cause extreme annoyance or discomfort to crew members so as to prevent the correct performance of assigned duties; and</li> <li>• In case of accidental activation, all hazardous effects must be confined within the equipment and must not produce extreme noise; and</li> </ul> <p>e) Security type equipment that is defective or that has been damaged is forbidden for transport.</p>						

## ADDITIONAL ARTICLES

↓ Items/Articles	Location →	Checked baggage	Carry-on baggage	On the person	Operator approval required	Commander must be informed
31	Camping stoves and fuel containers that have contained a flammable liquid.	✓	✗	✗	✓	✗
<b>Restrictions</b>						
<p>a) Must be drained of all liquid fuel; and</p> <p>b) The empty tank and/or container must be allowed to drain for at least 1 hour; and</p> <p>c) The fuel tank/container must be left uncapped for at least 6 hours to allow for any residual fuel to evaporate. Alternative methods, such as adding cooking oil to the fuel tank/container to elevate the flash point of flammable liquid and then emptying the tank/container are equally acceptable; and</p> <p>d) The fuel tank/container shall then have the cap securely fastened and be wrapped in absorbent material such as a paper towel and placed in a polyethylene or equivalent bag; and</p> <p>e) The top of the bag shall then be sealed or gathered with an elastic band or twine.</p>

34	<b>Drones</b> A drone or 'unmanned aerial vehicle' (UAV).	✓	✓	✗	See f	See h
<b>Restrictions</b>						
<p>a) Can be safely carried under the following conditions;</p> <p>b) If lithium-ion or lithium polymer batteries are used and fitted within the device, the drone can be carried as hand baggage or hold baggage, as long as the drone is, and can be protected from being accidentally activated;</p> <p>c) The size and weight limits of hand or hold baggage are not exceeded;</p> <p>d) The drone or UAV will form part of the customer's baggage allowance and must be included as such in whatever capacity (hand or hold baggage) the drone or UAV is being taken;</p> <p>e) Spare batteries must be protected from short circuit and damage, (carried within the packaging they are supplied with, away from any other electrical source – including each other) and can be carried in hand baggage only;</p> <p>f) For drones powered by batteries up to 100Wh, prior approval by TUI Airways is not required. For drones with batteries exceeding 100Wh but not exceeding 160Wh, prior approval by TUI Airways is required by contacting the Contact Centre;</p> <p>g) Drones with and batteries, or their spare batteries, exceeding 160Wh are forbidden from carriage;</p> <p>h) See table above covering lithium batteries depending on the battery strength.</p> <p><i>A number of countries have strict guidelines on the use of drones, where some countries do not allow drones to be used at all. It is entirely up to the users of such devices to ensure they are observing all country specific rules/regulations before attempting to take into one of these countries a drone or fly it.</i></p>
